PORTLAND TOWN COUNCIL

BIODIVERSITY POLICY

Policy Number	Version	Owner	Date Adopted	Review Date
033	Draft	Council	18th November 2026	November 2029

Introduction - Statutory Duty

Under the 2021 Environment Act, public authorities (including town and parish councils) who operate in England must consider what they can do to conserve and enhance biodiversity in England.

Government guidance published on 17th May 2023 clarifies that, as a public authority, town and parish councils must:

- Consider what they can do to conserve and enhance biodiversity.
- Agree policies and specific objectives based on their consideration.
- Act to deliver their policies and achieve their objectives.

Town and parish councils, unlike other authorities, are not obliged to publish a report on their actions, but the Government guidance requires all public authorities to complete their first consideration of what action to take for biodiversity by 1 January 2024. They must agree their policies and objectives as soon as possible after this and may reconsider the selected actions within 5 years of completing their previous consideration, or more frequently if they choose.

To comply with the guidance, town and parish councils could as a minimum:

- Have biodiversity as an agenda item for a meeting before the end of 2023.
- Note what action in respect of biodiversity is already taking place locally.
- Agree what further steps to take at this stage.

Such steps may include:

- Reviewing what biodiversity or nature recovery plans are already in place from other local authorities.
- Making contact with local voluntary groups working on nature conservation.
- Carrying out a biodiversity audit of council landholdings and/or the whole council area
- Gathering expert advice on possible actions in support of biodiversity.
- Drafting an action plan that covers action that the council will take itself as well as support for the actions of other local bodies.

Whatever action is agreed, as a minimum local councils could ensure they address biodiversity concerns when commenting on planning applications.

All these steps may inform an agreed biodiversity policy for which a model example is attached.

Guidance for town and parish councils on developing a local nature action plan has been published by South Gloucestershire Council, as well as a field guide for those with little or no ecological background.

BIODIVERSITY POLICY

INTRODUCTION

In accordance with the duty imposed on town and parish councils by Section 40 of the Natural Environment and Rural Communities Act 2006, updated by Section 102 of the Environment Act 2021, **Portland Town Council** will in exercising all its functions have regard to the purpose of conserving biodiversity.

This duty also means that town and parish councils can spend funds in conserving biodiversity.

DEFINITION

According to Defra (Biodiversity 2020), biodiversity is the variety of all life on Earth. It includes all species of animals and plants – everything that is alive on our planet.

Biodiversity is important for its own sake and has its own intrinsic value. A number of studies have shown this value also goes further. It is the building block of our 'ecosystems'. These provide us with a wide range of goods and services that support our economic and social wellbeing. These include essentials such as food, fresh water and clean air, but also less obvious services such as protection from natural disasters, regulation of our climate, and purification of our water or pollination of our crops. Biodiversity also provides important cultural services, enriching our lives.

AIMS AND OBJECTIVES

The object of this policy is to work towards enhancing and protecting the biodiversity of the Isle of Portland.

All committees of **Portland Town Council** will consider sustainability, environmental impact and biodiversity when making decisions and will develop and implement policies and strategies as required.

In particular, **Portland Town Council** will aim to improve the biodiversity of the area in the following ways:

- consider the potential impact on biodiversity represented by planning applications.
- manage its land and property using environmentally friendly practices that will promote biodiversity.
- support local businesses & council operations in the adoption of low impact practices.
- support residents and local organisation activities to enhance and promote biodiversity.

ACTIONS

Planning applications

- The council, when commenting on planning applications, will support site and building design that benefits biodiversity through the conservation and integration of existing habitats or provision of new habitats.
- It will support protection of sensitive habitats from development and will consider whether the development would mean the loss of important habitats for wildlife in respect of all applications.
- It will consider what each proposed development might make in terms of biodiversity net gain.
- It will include policies in support of biodiversity within the Neighbourhood Plan.

Land and property management

- The council will carry out a biodiversity audit of its landholdings and leased areas.
- The council will consider the conservation and promotion of local biodiversity with regard to the management of its open spaces. This will include adopting beneficial practices with regarding to cutting and removal of vegetation, application of chemicals and timing of maintenance work.
- Special care will be taken in the specification of grounds maintenance contracts to ensure that the work, whilst reaching acceptable standards, does not harm the natural environment.
- The council will consider biodiversity issues and the implementation of changes when managing its buildings.

Local community

- The council will raise public awareness of biodiversity issues, including through its website and newsletters.
- The council will engage with local businesses and residents regarding biodiversity in the community and how members of the community can assist and make a difference.
- It will, where feasible, involve the community in biodiversity projects on its land including for example tree planting, wildflower meadows, birdbox making.

Partners

- **Portland Town Council** will work in partnership with other organisations to protect, promote and enhance biodiversity within areas of Portland.
- It will review any local nature recovery strategies, species conservation strategies, or protected site strategies in respect of local sites of special scientific interest (SSSIs) and consider how it may become more involved in implementing the strategies' recommendations.

This policy will be reviewed each year at the Annual Meeting, together with a summary of how the policy has been implemented in the previous twelve months.

Action Plan

SITE	ACTION	OUTCOME
All areas of Council responsibility	Ecological Appraisals to be carried out on all areas owned or managed by the Council. Put in place a three year plan to manage biodiversity, with measurable outcomes. Protect and support biodiversity: • Raising local awareness of biodiversity. • Encourage suitable planting to support biodiversity.	To establish the nature of existing biodiversity and habitats. To enhance and improve biodiversity across Portland. Connect and diversify habitats to meet the needs of a variety of wildlife species
Gardens – Easton, Victoria and Ladymead	Management Plan to include: • Planting regime • Install bird/animal boxes as required	Increased diversity of habitats and food sources.
Weston Road and Stranger's Cemetery	Management Plan to include: • Additional planting (if appropriate) • Install bird/animal boxes as required • Adopt a plan to support wildlife and diversity whilst maintaining the site in a way which enables visitors to experience quiet and calm remembrance.	Increased diversity of habitats and food sources. Increased cover for invertebrates, reptiles, amphibians and small mammals. Encouraging insects particularly. butterflies and bees.
Recreation grounds and play areas	Management Plan to include: • Only use environment friendly pesticides where absolutely necessary and only in ideal weather conditions. • Sympathetically maintain hedges	Encourage insects Sustain and enhance natural habits
Other open spaces	Management Plan to include: • Encourage residents to remove litter and pick up after their dogs. • Work with Dorset Council (where possible) on verge management	Sustain and enhance natural habitats. Protecting/enhancing habitats

The built landscape	Ensure that planning consultations are considered against the requirements of the Neighbourhood Plan. Encourage hedgehog/small animal highways with permeable boundaries	Protecting/enhancing habitats. Extending habitats
Increase community awareness of biodiversity	Ask residents for their views on what they would like to be done to conserve biodiversity on Portland. Raise awareness of the importance of gardens as habitats for wildlife. Create a page on the Council website for photographs / information / links Discourage floodlighting.	Engagement/ownership of biodiversity. Promote biodiversity Promote biodiversity Protect nocturnal animals
Support community projects	Support hedge/tree/other planting in appropriate areas. Work in partnership with the Youth Council to develop young people's awareness of the environment around them. Work with local organisations to support biodiversity	Sustain and enhance natural habitats. Protecting/enhancing habitats Promote biodiversity Engagement/ownership of biodiversity.
